RE: BSE

Dear Dr. Henney:

I forgot to mention, I also have heard that the removal of Iletin I insulin, was due to the slight chance of BSE (mad cow disease) occurring in users. I have used Iletin I for 34 years and haven't caught BSE yet.

But if there is a slight chance of this happening, then I suggest that all of the McDonald's, Wendy's, Burger King, restaurants and grocery stores who sell beef products be banned from selling anything containing beef.

Our lives depend on it.

Most Sincerely,

Mrs. Charles W. Ford

Mrs. Charles W. Ford
